

Ohio Indoor Radon Program

Bureau of Environmental Health and Radiation Protection

Free Test Kits

- www.ohio.radon.com

Radon is the number one cause of lung cancer for non-smokers and the second leading cause of lung cancer in smokers.

You can reduce radon levels, but the only way to know if your home has high radon levels is to test.

Free radon test kits are available for Ohio homeowners.
Order your FREE test kit now.

Radon can be reduced with a mitigation system. Use this link to find a **radon mitigation contractor** licensed in Ohio: [Find a Licensed Radon Contractor](#).

- 7,055 clicks were sent to the ODH Radon website.

Ohio Comprehensive Cancer Control Plan 2021-2030

Exposure to Environmental Carcinogens

OBJECTIVE 2: By 2030, increase the number of new radon mitigation systems installed in Ohio homes from 67,668 to 167,668 (baseline: ODH RADMAT, Licensed Radon Contractors quarterly reports).

Strategies

- Increase public awareness of the connection between radon and cancer risk.
- Encourage home buyers and sellers to hire Ohio licensed radon professionals.
- Educate realtors, building code officials, medical professionals and housing authorities about radon, the risk of lung cancer, and their role in reducing lung cancer.
- Support legislation for building codes that include Appendix F of the International Building Code.
- Reduce out-of-pocket costs associated with radon testing and mitigation.

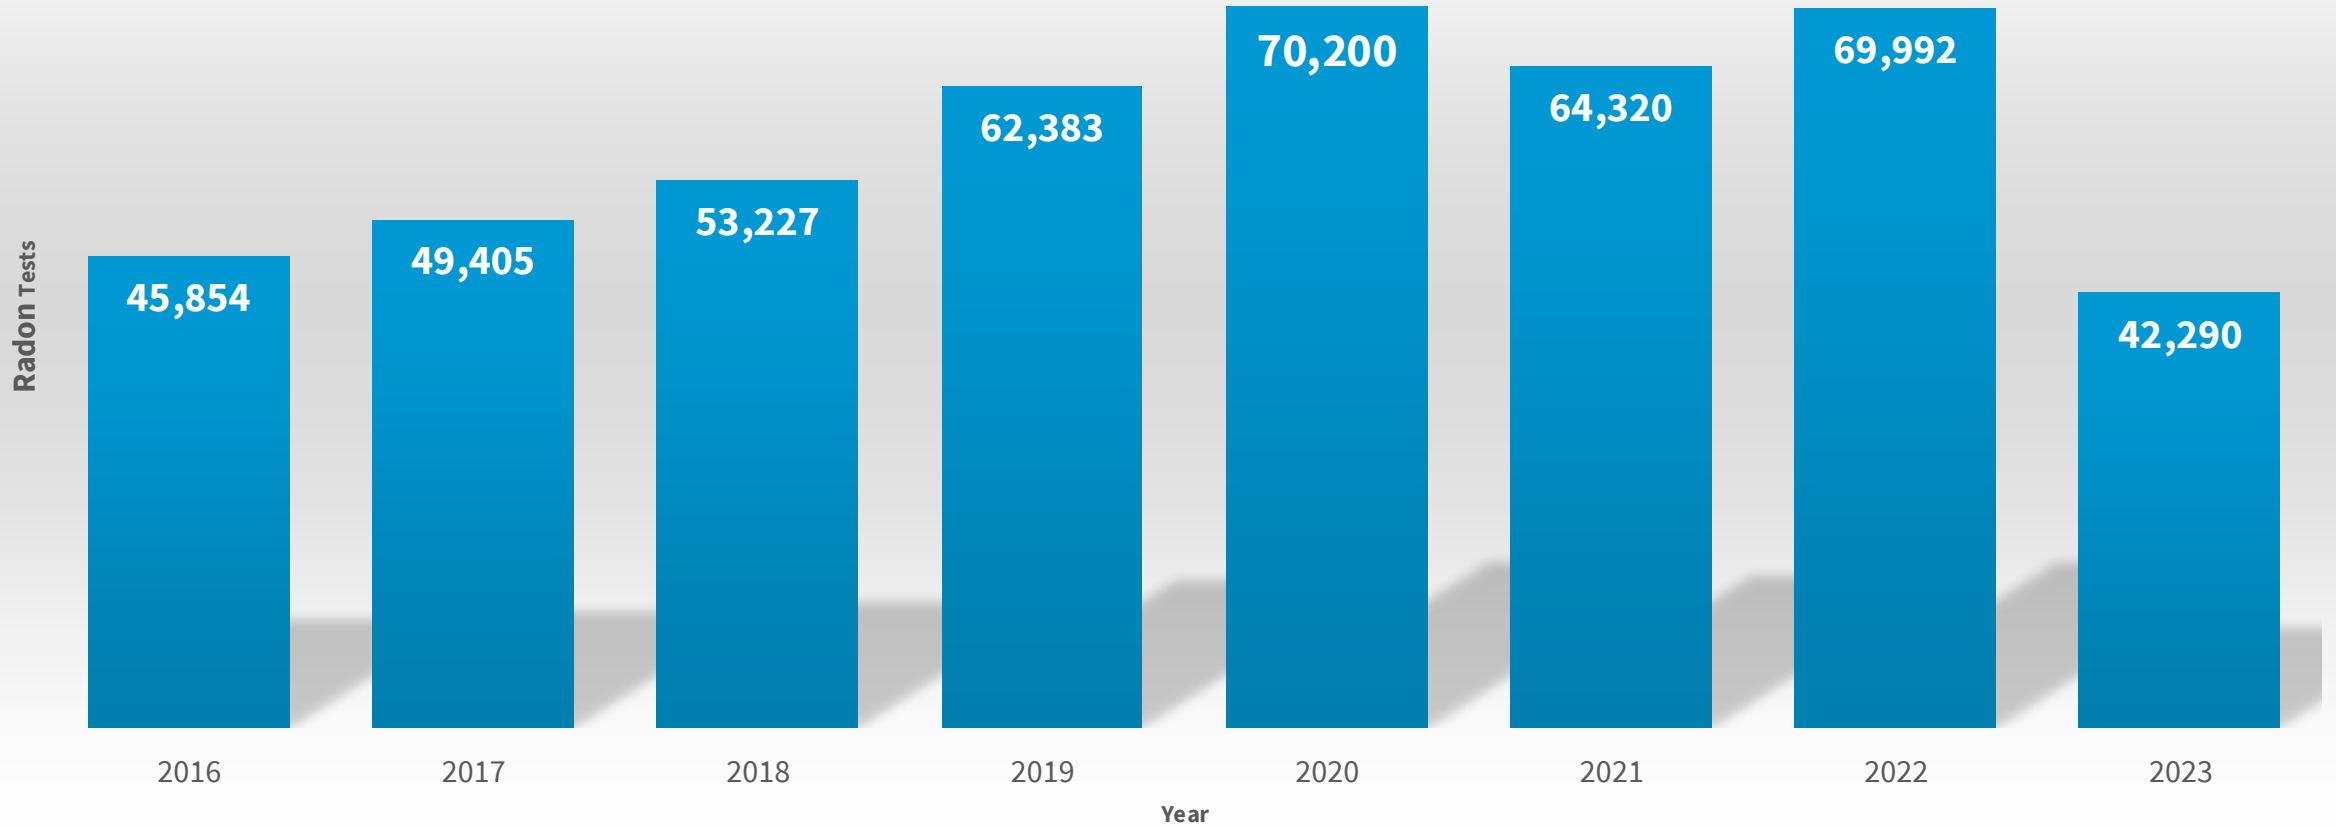

Current Radon Licensees

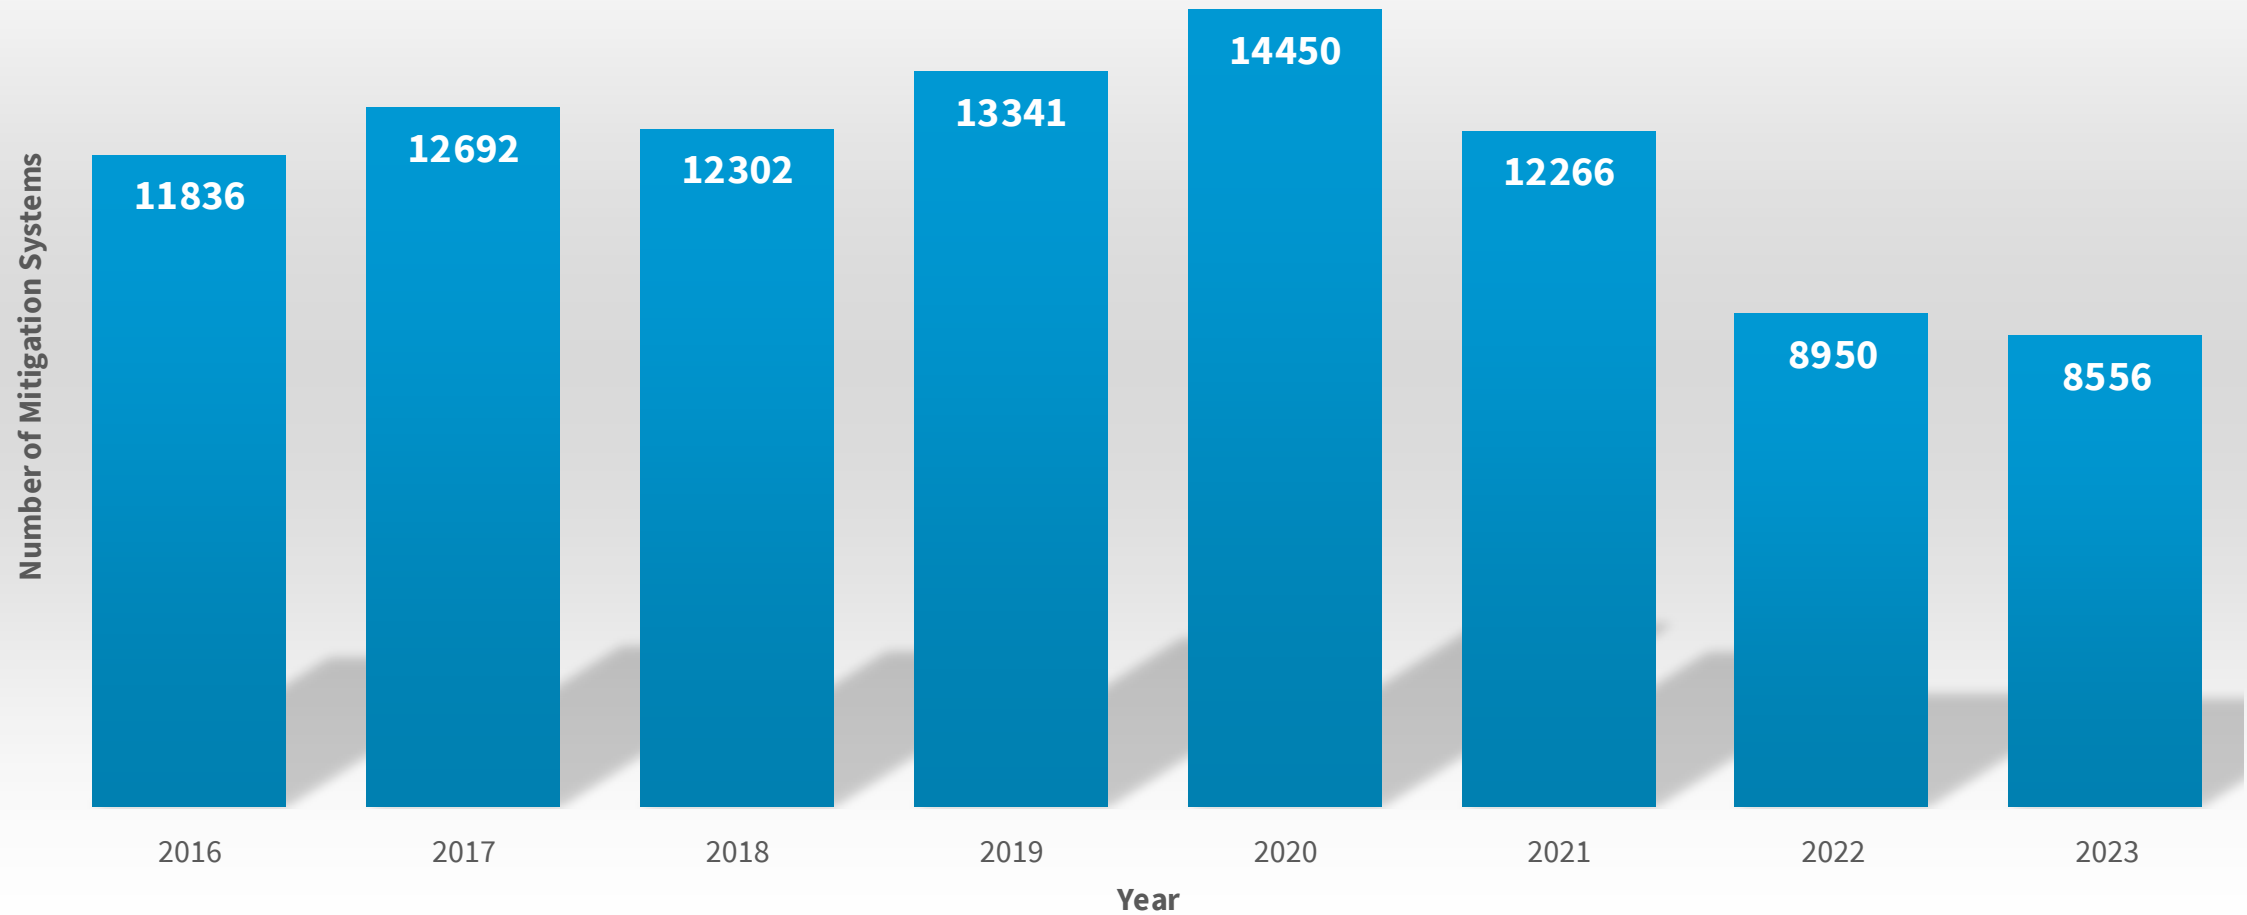

Radon Testers	514
Radon Mitigation Specialists	212
Radon Contractors	134
