2025 EPA REGION 5 RADON STAKEHOLDERS MEETING

JENNIFER BERK

ENVIRONMENTAL MANAGER
LEAD AND HEALTHY HOMES

08/15/2025

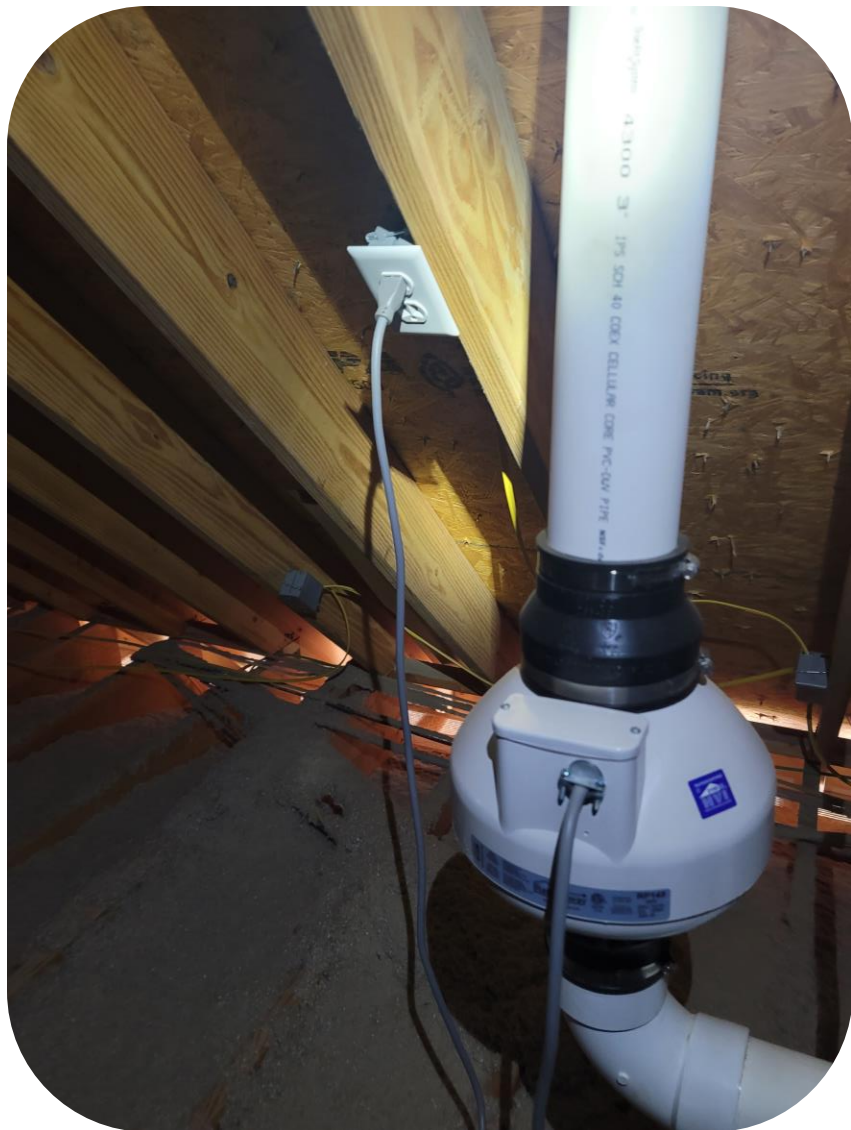

OUR MISSION:

To promote, protect, and improve the health and safety of all Hoosiers.

OUR VISION:

Every Hoosier reaches optimal health regardless of where they live, learn, work, or play.

Indiana Radon Updates

Radon Reporting Portal

Improvement to Data Entry

- Adjusting parameters to allow more consistent data entry
- Ensure that data is reported through selection of specific options
- Data refinement to ensure accurate reporting and useability

Challenges

- Office of Technology limits on Out-of-State IP addresses
- Contractors who were licensed but had no systems/testing still need to report 'No work performed'
 - New licensees who acquire late in the year still need to report

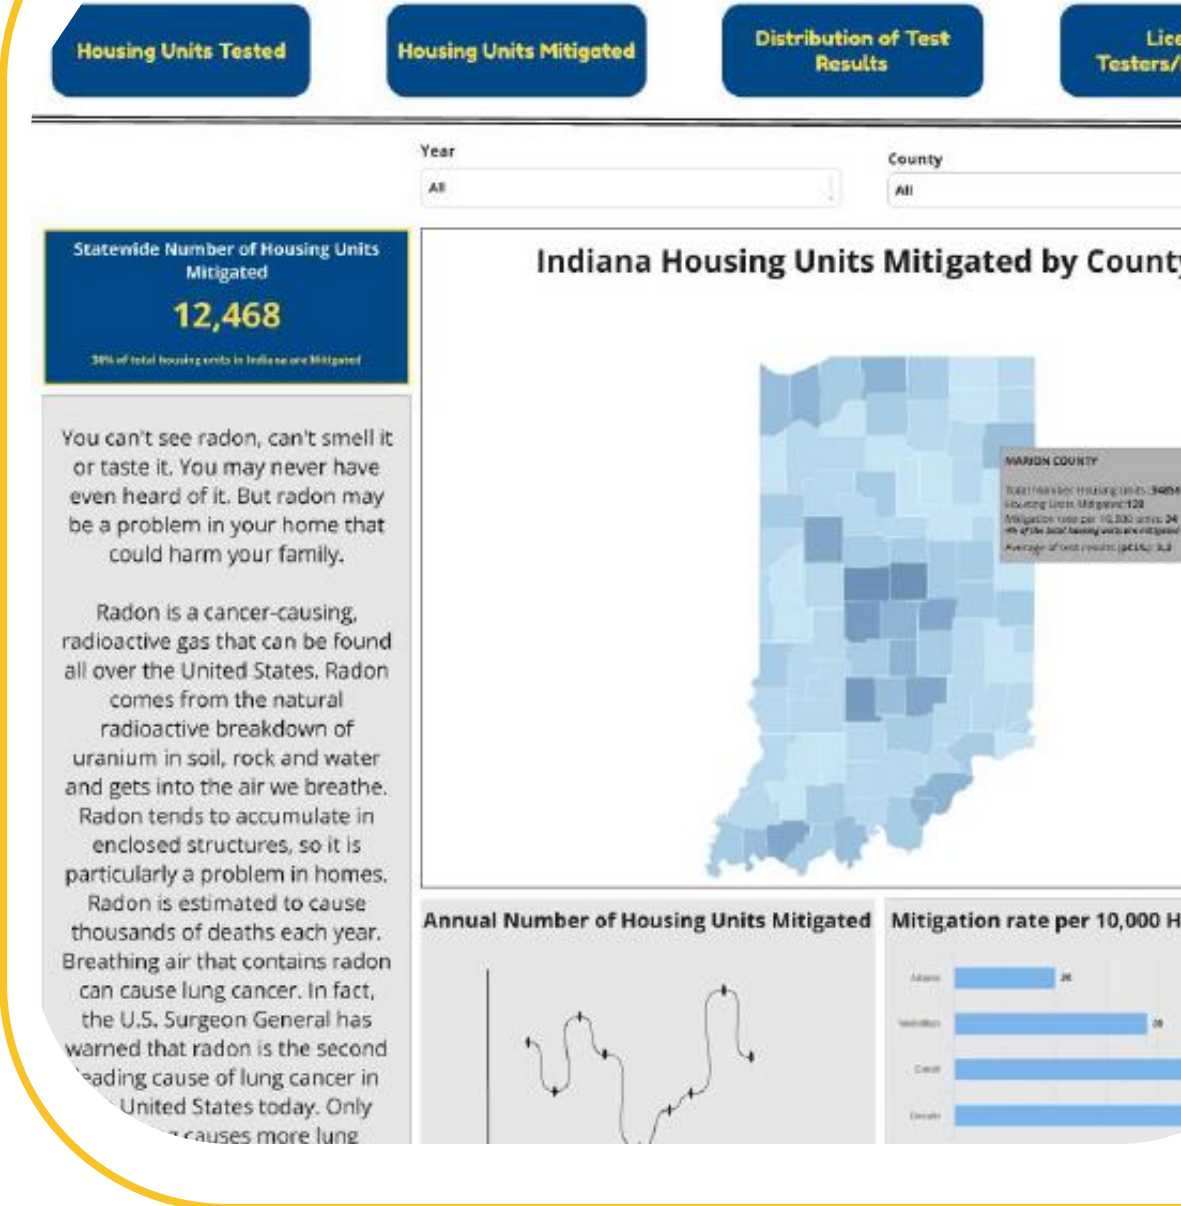

**Measurement/
Mitigation
Reporting**

2024: 52%

2025: 71%

Radon Dashboard

- Collaboration with the Office Data and Analytics will create a radon dashboard for the citizens of Indiana
- Location of measurement and mitigation specialists
- Average of radon testing results throughout the state as well as within each county
- Projected launch in mid 2026

AARST QA/QC

FY25 marks the start of round five

- Homeowner agreement continues to be a challenge (18%, increase from 15%)
- Majority of non-compliance on systems was informational (labeling), not functionality
- Little more than half the systems needed labeling corrections
- Manometer marking was next common issue (20%)
- Only 1 out of 25 measurement audits had a major deficiency (No QAP)

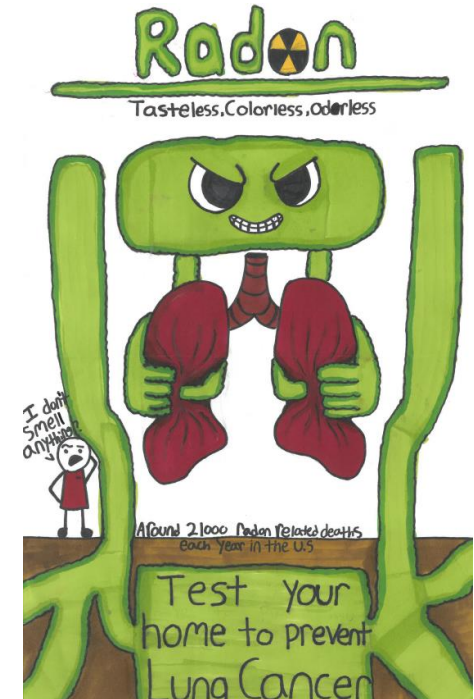

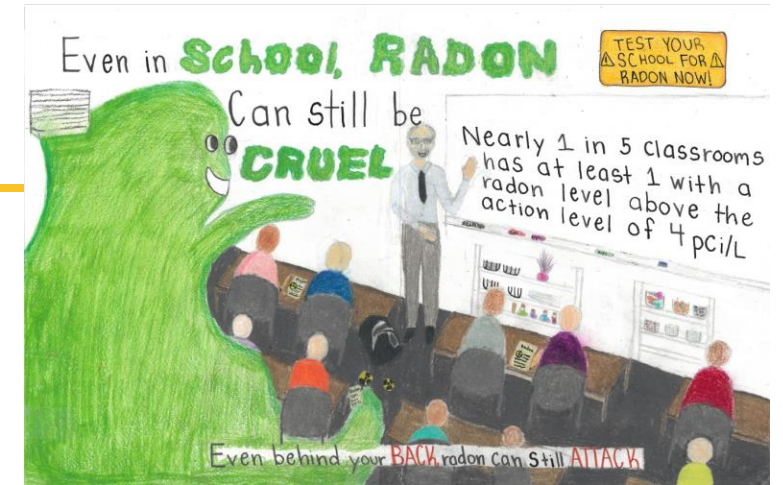

In 2023, the Indiana Department of Health (IDOH) partnered with EPA to inspect a random selection of radon mitigation systems in Indiana under 410 IAC 5.1-1-29(d). The program seeks to improve the overall quality of Indiana radon professionals by identifying possible installation issues regarding both requirements and best practices as identified in ANSI/AARST SGM-SF-2023. In 2023, **Andreas Johnson (RTM01279)** installed a radon mitigation system at **3038 Stilton Drive, Cicero, Indiana 46034**. The following **minor issue** was identified:

- 1) Label for radon systems where owner/occupant maintains the system includes notice of state/federal radon resources. Note - There is a QR code with an indication to scan for more information.

While the listed **minor issue** is not required to be corrected at this time, they do not meet the regulatory requirements for radon mitigation installation. Please contact your installer to correct all issues.

Key Engagements

- Indiana Poster Contest
- Indiana Radon Hotline
- Creating the Radon Dashboard
- School Testing Grants
- RRNC Engagement with Builders

Radon Metrics

2024	Goal	Metric
34,120	30,000	Number of addresses tested for radon
23.4%	23.3%	Percentage of homes that test at or above the acceptable level of radon (4.0 pCi/L).
17.5%	44.3%	Percentage of homes that test at or above the acceptable level of radon (4.0 pCi/L) and receive mitigation.
